The International One Stop Travel Shop

Introduction to Corporate Membership

Well Travelled Clinics (WTC) Ltd is a company of the Liverpool School of Tropical Medicine (LSTM). We provide an expert advice and travel risk assessment service to overseas workers regarding travel health, vaccinations, anti-malaria tablets and specific health and safety issues related to working abroad.

If you are a company who regularly sends staff overseas as part of their work, then you may want to consider one of our corporate membership schemes. We can help you ensure that your staff are fit to travel and ensure that they receive the correct vaccinations, tablets and health advice for their destination.

We stock all vaccines, malaria tablets and products right here, so your staff have a one-stop shop, saving them time before they travel. We are also able to carry out most blood tests that are required for either visa or occupational purposes including Mantoux tests.

Other Corporate Services

We also offer a flu vaccination service to corporate clients. This may be carried out in your own workplace if you have suitable facilities.

We can design bespoke travel kits to be issued to your staff if you need particular first aid, emergency treatment or anti-bite kits issued to members of your team.

The Membership Schemes

There are four standard schemes available:

Traveller Voyager Explorer Pioneer

These services have been developed to meet the needs of most companies, so have a look at the accompanying "well covered" leaflet to see which scheme best meets your needs. If however, you would like us to provide other services, or want one particular option of another membership scheme, just let us know and we can design a bespoke package to fit your requirements.

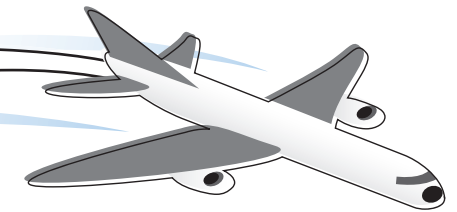

Supporting the work of the Liverpool School of Tropical Medicine

The Liverpool School of Tropical Medicine, was founded in 1898, becoming the world's first institution devoted primarily to tropical health. It has extensive links with UN organisations, health ministries, universities, non- governmental organisations and research institutions worldwide and is involved in numerous programmes to control diseases of poverty and to develop more effective systems for health care. LSTM prides itself on its links with developing countries and is committed to increasing such partnerships.

Our profits are reinvested into research and development within WTC and LSTM. By purchasing your vaccines, tablets and travel products from us you are supporting the work we do to control diseases of poverty and to develop more effective systems for health care in the less developed countries in the tropics and sub-tropics.

Why choose Well Travelled Clinics?

- We really are the experts in travel and tropical health.
- We are a centre of excellence and train all our own nursing and medical staff who work in our clinics.
- We have clinic appointments available at short notice and in the evenings and at weekends.
- We are a one stop shop. You can get all your vaccines, tablets and travel health supplies in our clinics.

WELL RESPECTED !
